

AccelaSMART™

PREMIUM

A Powerful Workflow and Coding Resolution Engine

Automated Charge Review - The AccelaSMART PREMIUM resolution engine makes it easy to automate special circumstances, practice preferences, and even physician quirks. No other system can provide the same level of automation and adjustments for keeping practice throughput optimized.

Coding Resolution - In addition, AccelaSMART PREMIUM provides an intelligent, customizable, rules-based management and automated workflow engine for coding resolution, front-end denial preven-

tion, exceptions, variations, change processing and MD/practice-specific preferences. AccelaSMART PREMIUM enables your billing staff to access technology similar to what payers use to deny your claims. Every charge is reviewed against a comprehensive coding resolution, custom rule, and workflow engine. Errors or missed charges are automatically routed to the practice administrative staff along with real-time suggestions and tools to correct each encounter. Corrected clean encounters are then uploaded into the practice management system for immediate processing.

By automating workflow and verifying coding, your practice can:

- Enable edits to be applied consistently across all charges, regardless of provider, coder, or clerk
- Allow uniform application of clinical rules and review of encounters for custom, general, or carrier-specific rules
- Deliver integration of the discovery and correction of errors, so each encounter leaves the system only after thorough review
- Drive up collection of missing charges through automated E/M review
- Provide flexibility in delivering charges to the PMIS

Charge Capture Options

continued on reverse >

“ Work that previously took us up to an hour and a half before AccelaSMART, now takes us only 15 or 20 minutes. ”

Office of James Holzhauser, MD - Columbus, MS

WHITE PLUME

AccelaSMART PREMIUM can be used simultaneously with any of the ePASS charge capture solutions such as AccelaSCAN (scannable paper superbills), AccelaCAPTURE (electronic superbills), or AccelaPASS (charges downloaded from and EMR or EHR system).

AccelaSMART PREMIUM enables physicians and their business staff to work together to attack lost revenue from every angle. With a powerful coding resolution engine at their fingertips, your billing staff are able to utilize the same technology payers use to deny your claims. Possible omissions are identified before they result in missed reimbursement. Coding errors are presented to staff with suggestions for correction before the error results in a denial.

Features of the ePASS Workflow

Automated charge capture

- > Safe and efficient workflow eliminates costly manual keying of charges
- > Charge data automatically routed to the AccelaSMART PREMIUM editing engine
- > Chosen method mimics existing workflow, maintains the ability to capture accurate charge data
- > Significantly increased productivity frees employees to perform other vital tasks

Coding resolution

- > All charges are reviewed by the AccelaSMART PREMIUM multilayered code editing engine
- > The software guides staff through the editing process by only flagging those encounters where possible errors or omissions exist
- > When AccelaSMART PREMIUM presents a possible error or omission, it also provides suggestions for corrections
- > Staff makes real-time decisions and corrections

Seamless interface

- > Clean claims are uploaded electronically to the practice management system on the front end of the claims process
- > Staff can conduct a final review of completed charges in the practice management system, print reports, and submit claims as they do today

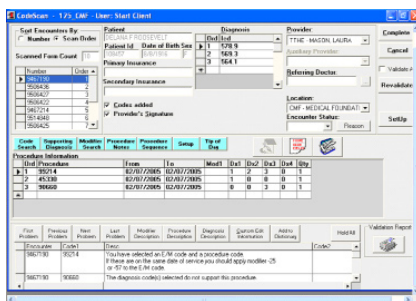

Features and capabilities of the AccelaSMART coding resolution

Each charge is reviewed for compliance against comprehensive coding rule sets

- > Medicare Correct Coding Policy
- > Medical Necessity Guidelines
- > Blended Local Coding Decisions
- > Practice-specific edits designed by your practice for your practice to be specific to your payers, providers, and specialty

Software editing capabilities

- > Bundling and unbundling
- > CPT and ICD-9 correlation errors
- > Invalid ICD-9 codes
- > Missing modifiers
- > Specificity level (4th and 5th digits)
- > Appropriate E/M coding
- > Payer-based dependencies
- > Practice-based dependencies
- > Comprehensive code scrubbing technology reviews each charge
- > Safe and efficient electronic workflow replaces costly and error-prone manual processes
